Introduction

ET-2242/PET-2242 is a 16-channel digital output (Sink-type) module. Each channel provides photocoupler isolation and short circuit protection, capable of driving a 650 mA load. The module includes a built-in 2-port Ethernet switch, facilitating a daisy-chain topology. This feature offers flexibility in device configuration, simplifies installation, and reduces infrastructure costs. Additionally, the module provides EMS (EFT/ESD/Surge) protection and 3000 VDC I/O isolation to enhance noise protection capabilities in industrial environments. It also offers configurable DO power-on value and safe value settings.
